

Your gateway to european bicycle manufacturing

since 1991

# FOUNDER

## We are Olpran - Traditional bicycle manufacturer from the Czech Republic

The company Olpran was founded shortly after the fall of the Iron Curtain and from the very beginning it was dedicated to the production of bicycles. It was founded by Mr. Jaroslav Luňák, who together with his sons and close associates still runs the company today.

In 2008 we built a modern production plant in the heart of Europe - in the Czech Republic. Here, with passion and emphasis on quality, we produce a wide range of bikes - from basic models to special carbon bikes for demanding customers.

Over the course of its history, the Olpran brand has become the preferred choice not only of ordinary cyclists but also of top athletes. Olpran bikes have been ridden by:

Today, Olpran stands for tradition, reliability and fair partnership - and we are ready to continue our story with you.

In the middle  
of Europe

# Antidumping Solution

Your Gateway to the EU Market

solution

# Antidumping Solution

We offer a complete service from OEM assembly to customized logistics solutions.

We provide comprehensive support in the areas of administrative and customs services, as well as a high level of professionalism in production processes and quality control.

In addition to handling administrative procedures, we offer a range of benefits that cover your order from start to finish.

## **How does it work? And what can we do for you?**

We store components and goods in a fully automated storage system.

We handle the administrative processing of receipts and dispatches.

We take care of customs clearance for goods.

We investigate costs within the framework of EU exemptions.

Let's start with what interests everyone: money – costs. How can you save money with us?

You have already encountered the term "anti-dumping." In the context of EU market protection, this refers to a compensatory fee that must be paid upon import.

However, there are exceptions, and we offer them to you as a benefit.

Anti-dumping exemptions are situations where goods are exempt from anti-dumping duties, even if they would normally be subject to them. These exemptions can be granted under specific circumstances, often related to the volume of imports or the nature of the importing entity. And we have them.

**Thanks to these options, you can save up to 80% on fees for selected components.**

# PRODUCTION LINES

## CAPACITY

more than  
250 000  
bikes per year

## PRODUCTION LINES

### **Production capacity up to 250 000 bikes per year**

Our modern production lines in the heart of Europe allow us to produce up to **250 000 bicycles per year, including 100,000 electric bikes.**

Thanks to efficient planning, automated processes and an experienced team, we are able to respond flexibly to market demands and the specific needs of our partners.

This capacity makes us a reliable OEM manufacturer with the strength to handle large orders and long-term cooperation.

Marchetti  
air-lines

# PRODUCTION LINES

## Production on Marchetti Air Lines

At Olpran, we use two modern assembly lines, **Marchetti Air Lines**, which are among the most efficient solutions in the field of bikes production.

These lines ensure a smooth, ergonomic and highly precise assembly process that allows us to maintain the **high quality of each bike** while optimizing time and production efficiency.

Thanks to this cutting-edge technology, we are able to produce high volumes of bikes with an emphasis on consistency, quality and speed.

stations

# WHEEL LINES

## Top technological facilities

Olpran's production is equipped with advanced technologies that ensure high efficiency, precision and quality of each wheel. We have **four Holland Mechanics** assembly lines that are the world standard in bicycle manufacturing. We use two automatic Tire Mounting Machines and two Hub Filling Stations.

This technology fleet allows us to handle even demanding OEM orders in high volume, while maintaining attention to detail and quality workmanship.

# AUTOMATIC **LOADING SYSTEM**

## **WAREHOUSE**

for 60 000 bikes

# AUTOMATIC **LOADING SYSTEM**

## **Fully automated warehouse for 60 000 bikes**

Our production capacity is complemented by a fully automated warehouse system with a **capacity of up to 60 000 bikes**. This system is designed to handle the automatic loading and unloading of bicycles without the need for manual handling. With this technology, we significantly increase the speed, accuracy and safety of our logistics processes.

The automation also allows us to respond flexibly to customer needs and manage the flow of goods efficiently, even with high seasonal demand.

Republic

# LOCATION

## **Strategic location in the heart of Europe**

Our production and warehouse facilities are **located in the Czech Republic**, in the heart of Europe. This advantageous geographical location makes us an ideal logistical partner for the distribution of goods throughout Europe.

**Short delivery times, excellent transport accessibility** and the ability to respond flexibly to customer needs make Olpran a reliable and fast OEM partner for European and global brands.

## ISO 9001:2015 certification - Guarantee of quality and professionalism

Olpran is ISO 9001:2015 certified, confirming our commitment to high quality manufacturing, process control and continuous improvement.

This international standard defines the requirements for a quality management system and is recognized worldwide. For our partners and customers, this means that:

- we have all key processes under control,
- we produce in accordance with strict quality standards,
- we continuously improve production efficiency and reliability,
- and we place emphasis on transparent and professional cooperation.

For us, ISO 9001:2015 is not only a certificate, but above all a commitment to quality, trust and long-term partnership.

## We are ready for cooperation

**Are you interested in cooperation, bikes production or want more information about our services?**

Do not hesitate to contact us - we will be happy to get in touch with you to discuss the next steps.
